EXPERIENCE

Now

ZenHub – www.zenhub.com

Head of Technology (2 years and counting)

ZenHub is a task and project management app built on top of the GitHub platform. My mission is to grow & lead our engineering team and create a scalable & performant architecture for our cloud and on-premise customers. As a member of the leadership team, I am responsible for our infrastructure and development process.

- Led hiring & onboarding of hybrid/remote team. Grew eng. team from 13 to 18.
- Established a culture of ownership, individual responsibility, and personal growth
- Setup engineering KPIs, monitored performance, throughput, velocity, and optimized internal workflows and culture to improve those metrics.
- Shipped a large number of core product features and technologies.
- Oversaw modernization of legacy systems with minimal downtime for customers (our tech stack is React, Apollo, GraphQL, Ruby on Rails, and Kubernetes)
- Shipped production code, mostly focused on optimizing our internal systems, developer experience, and customer retention.
- Worked with marketing team to raise brand awareness by crafting technical articles, blog posts, podcasts and virtual conference talks.
- Contributed to & embraced open source initiatives to drive internal goals.

2019

Cumul8 Technologies Inc. – www.cumul8.com

Cumul8 (subsidiary of Eight Solutions) was a public media technology company that initially focused on products for the visual effects industry. Over my 9 years there, the company has pivoted to focus on big data and industrial IoT for Enterprise.

Technical Director (2 years, 7 months)

- Led and managed a software team of 20 devs (mix of remote & in-house).
- Influenced product strategy, roadmaps, and provided technical guidance to CEO.
- Drove the automation and QA efforts and coordinated outsourced vendors.
- Steered engineering initiatives; identified & filed patent applications.
- Created and refined software patterns and engineering best-practices.
- Oversaw the DevOps team and helped refine the cloud infrastructure
- Engaged with partners and customers to lead technical conversations and audits.
- Continued to be a hands-on coder, shipping many client-facing product features.

Lead Developer / Programmer (5 years, 3 months)

- Influenced the hiring strategy and grew the team from 3 to 12 developers.
- Assisted the senior management in securing and executing on custom integrations.
- Built and maintained the microservices software architecture platform.
- Architected the React-based implementation of the Cumul8 BI analytics platform.
- Acted as representative for the company at local tech meetups and conferences.

2011

Globex Designs, Inc. – www.globexdesigns.com

Founder/CEO (12 years, part-time)

Part-time project development, web & media design, 3D animation, music composition and business operations. Designed and developed a variety of media projects for over 100 international clients. Development of custom in-house bug tracking, project management, scheduling, billing and invoice system for managing clients and distributed development with other artists and developers from around the world.

Created and developed the *Google Redesigned* Firefox extension which, at its peak, was used by over 250,000 concurrent users. I built the underlying infrastructure too.

Together with Lexan Software Inc, I was the art director and project manager for the iOS/Android game – *Tesseric*.

EDUCATION

2010

Emily Carr University of Art + Design Vancouver, Canada.
Bachelor of Media Arts with a major in Animation (BMA).

Ev Haus

CTO | TECHNICAL DIRECTOR

VANCOUVER, CANADA

www.linkedin.com/in/EvHaus

TECH I KNOW REALLY WELL

JavaScript | Node.js

TypeScript | Flow

React | Redux | Webpack | Babel

HTML | CSS

Photoshop

TECH I'VE USED PROFESSIONALLY

GraphQL | Apollo

Python | Golang

Kubernetes | Terraform | AWS | GCP

PostgreSQL | MongoDB

React Native

Figma | Sketch | Abstract

OPEN SOURCE CONTRIBUTIONS

React | ESLint | Meteor | jQuery | Dojo

Backbone | Brackets | Firefox

A BIT ABOUT ME

I'm a self-taught coder, a professionally trained designer, animator and musician. I've been working in the web technology field since the early 2000s in a variety of roles. I am obsessed with high quality, attention to detail and efficiency. I strive for balance and rationale in my decisions, and I'm constantly learning. Most recently I've been working at smaller start-ups helping them realize their full potential.
